

Shamsh co. for trading and general contracting ltd

Company Profile - JAN 2023

who
WE are

Shamsh the only authorized distributor to sell, distribute and service the Gensets products in Iraq. Shamsh provides a full range of power system solutions for various applications and businesses.

These applications diversify from industrial and oil & Gas to commercial services, health care facilities, poultry, telecommunication, water desalination and treatment stations, and mining; as well as prime power systems for residential and mission-critical applications such as data

centers and power generating plants.

The company provides a wide range of electrical services, ranging from 17 to 3750kVA generating sets; in addition to automatic transfer switches (ATS), paralleling switchgear, components, and services in prime and standby power. We also deliver fuel systems, sound-attenuated and weatherproof enclosures, and a complete array of services and solutions, varying from long-term operation and maintenance contracts, remote monitoring systems, turnkey and temporary power solutions to meet the needs of a diversified customer base.

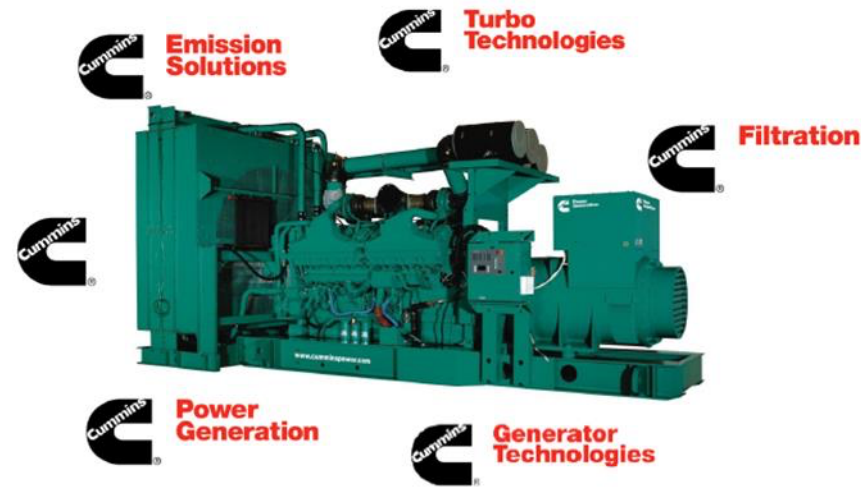

The Power OF One

All the Gensets main components are manufactured by a single source, dubbed 'the Power of One' or 'the Power of Shamsh. These components include Engine (Cummins, Perkins, Caterpillar, Siemens, GE, FG Wilson, Dutch and ABZ), Alternator (Stamford, Leroy somer and Caterpillar), Control Panel (PCC), Fuel System, Turbocharger, and Fuel Filtration, ensuring consistency and harmony to eventually satisfy customers.

All aspects of generator set design, manufacturing and service have been brought together in one company. All the major components –the engine, alternator, control systems and containers –are manufactured and built by Shamsh. Shamsh provides a superior combination of solution design expertise

Genuine Parts **Built for durability, longevity, and dependability**

Gensets Genuine Parts are built to exact specifications for our products and made using materials and procedures that match our dependable products. Therefore, our parts are better than non-genuine parts.

Browse our parts catalog, find your Engine Serial Number, and learn more about why Genuine Parts are the best for your Gensets products.

The difference between a Genuine Gensets Part and a non-genuine part isn't always easy to see.

Shamsh provides complete Gensets maintenance, ensuring improved up time to aid the productivity of your business. By adopting (Cummins, Perkins, Caterpillar, Siemens, GE, FG Wilson, Deutz and ABZ) recommended maintenance practices, customers will benefit from reduced life cycle costs.

We guarantee that your generator will startup and work as specified after the sale. We know you don't cut corners in your business, and neither do we. We are confident we can provide you and your business with the utmost service, quality, dependability, and satisfaction.

Shamsh Service team always ensures your Power source up time by providing 24*7 Care. Our service experts can continually monitor and maintain your power system through comprehensive maintenance options keeping your equipment in peak working condition.

Nothing Guards Like **Fleet guard**

Gensets Filtration is the leading worldwide designer and manufacturer of filtration products for heavy-duty diesel powered equipment. It owns the well-recognized brand of Fleet guard™, manufacturing class-leading filtration products compatible with Gensets and a wide range of other engine makes.

Fleet guard provides a full range of filtration products to meet our customer's needs for a variety of applications including: Agriculture, Bus & Truck, Construction, Defense, Generator Sets, Industrial, Mining, Marine, Oil & Gas, Rail.

Fleet guard Product Types:

- Air intake and filtration
- Coolant and coolant treatment
- Centrifugal filtration
- Closed crankcase ventilation filtration
- Fluid filtration
- Hydraulic filtration (industrial and mobile)
- Fluid analysis and coolant test kits

Benefits of our products include:

- Extended uptime
- Increased operator comfort
- Lower operating costs
- Reduced environmental impact
- Broad product range
